

# HIBA HASHEM

## Senior Flutter Developer | Mobile Software Engineer

Damascus, Syria | hashemhiba4@gmail.com | +963 998 877 834

### PROFESSIONAL SUMMARY

---

Flutter Developer with 4+ years of experience building and shipping scalable, cross-platform mobile applications for Android and iOS. Skilled in Dart, Flutter, Clean Architecture, and state management (BLoC, Provider, Riverpod, GetX), with hands-on experience integrating RESTful APIs, Firebase services, payment gateways, and third-party SDKs. Experienced managing the full mobile release lifecycle, from CI/CD automation with Codemagic to Google Play Store and Apple App Store deployment. Works closely with product managers, designers, backend engineers, and QA teams in Agile environments to deliver reliable, user-friendly mobile products.

### TECHNICAL SKILLS

---

**Languages & Frameworks:** Flutter, Dart

**Platforms:** Android, iOS (cross-platform development)

**Architecture & Design:** Clean Architecture, MVC, MVVM

**State Management:** BLoC, Provider, Riverpod, GetX

**Backend & Integrations:** RESTful API Integration, JSON Parsing, Firebase (Authentication, Firestore, Analytics, Crashlytics, Cloud Messaging / Push Notifications), Payment Gateway Integration, Third-Party SDK Integration

**Mobile Features:** Push Notifications, Deep Linking

**DevOps & Tooling:** Git, GitHub, GitLab, CI/CD (Codemagic, GitHub Actions basics), Mason Bricks (code generation & project scaffolding)

**Release Management:** Google Play Store & Apple App Store Deployment

**Practices:** Agile / Scrum, Code Review, Debugging & Testing, Clean Code Practices

### PROFESSIONAL EXPERIENCE

---

#### Senior Mobile Application Developer | R-link

Feb 2025 – Present

- Develop and maintain scalable, cross-platform mobile applications using Flutter and Dart, delivering features for both Android and iOS from a single codebase.
- Design responsive, user-friendly interfaces with a focus on performance and usability, improving overall user experience across supported devices.
- Implement advanced state management (BLoC, Provider, Riverpod) to build maintainable, testable application architecture, reducing coupling between business logic and UI [ADD METRIC: e.g., reduction in bug reports or code review time].
- Integrate RESTful APIs, Firebase services (Authentication, Firestore, Analytics, Crashlytics, Cloud Messaging), payment gateways, and third-party SDKs to extend application functionality.
- Optimize application performance by reducing load times and improving responsiveness, resulting in [ADD METRIC: e.g., % reduction in load time or crash rate] across supported devices.
- Collaborate with UI/UX designers, backend engineers, QA, and product managers in Agile/Scrum environments to deliver end-to-end mobile solutions aligned with business objectives.
- Own testing, bug triage, and release management for applications published to Google Play Store and Apple App Store.
- Configure and maintain CI/CD pipelines using Codemagic, automating builds and streamlining the mobile release process.
- Build reusable Flutter packages and modular project templates using Mason Bricks, improving development speed and code consistency across projects.
- Apply Clean Architecture principles to deliver secure, scalable, and maintainable codebases.

### Mobile Application Developer | Ridgetech

Aug 2024 – Feb 2025

- Maintained code quality and version history using Git, contributing to a collaborative, review-based development workflow.
- Implemented Firebase Authentication and Push Notifications (Firebase Cloud Messaging), enabling secure sign-in and real-time user engagement.
- Partnered with UI/UX designers to translate designs into intuitive, user-friendly Flutter interfaces.
- Applied GetX and BLoC state management patterns, building hands-on expertise across multiple state management approaches.
- Supported deployment, updates, and ongoing maintenance for applications live on Google Play Store and Apple App Store.
- Participated in Agile ceremonies, including sprint planning, contributing to iterative feature delivery.

### Mobile Application Developer | Madfox Solutions

Jan 2023 – Jan 2024

- Contributed to development and maintenance of production-level Flutter applications used by active users in real-world conditions.
- Built scalable, cross-platform features using Flutter and Dart with a focus on reliability and performance.
- Delivered production-ready features while maintaining high app stability and a seamless user experience for [ADD METRIC: e.g., number of active users or downloads].
- Integrated RESTful APIs, Firebase services, and third-party libraries to support core business functionality.
- Resolved live production issues and shipped feature updates and performance improvements based on user feedback and business requirements.
- Collaborated with product managers, designers, QA, and backend developers across the full development lifecycle.

### Mobile Application Developer | SunriseIT

Jul 2022 – Nov 2022

- Connected mobile applications to RESTful APIs and external services to support dynamic, real-time data handling.
- Improved application speed and responsiveness through efficient coding and optimization techniques [ADD METRIC: e.g., % improvement in load time].
- Implemented structured state management approaches to improve code maintainability and scalability.

## EDUCATION

---

### B.Sc. in Software Engineering

College of Information Technology Engineering, Damascus University

2019 – 2023
